# PRO-X elements Functional Materials

## SympaTex<sup>®</sup>

In addition to the proven PXE membrane, **PRO-X elements** for the first time counts on Sympatex<sup>®</sup> to reinforce the premium sector of the brand. **PRO-X elements** as a proficient producer of foul weather clothing and Sympatex<sup>®</sup> as renowned high level membrane manufacturer complement each other in an ideal partnership. The Sympatex<sup>®</sup> membrane is highly breathable, 100% wind- and waterproof and regulates the climate. It is 100% recyclable, bluesign<sup>®</sup> certified, and it received the 'Öko-Tex-Standard 100' certificate. It is also PTFE-free and PFC-free. Together with the PFC free impregnation "Bionich Eco Finish", Sympatex<sup>®</sup> laminates are amongst the fabrics with the lowest emission.

## PXE 4WAY Stretch

PXE 4WAY Stretch is a 2-layer laminate consisting of an extremely stretchable bi-stretch fabric and the innovative PXE-Membrane which guarantees excellent waterproofness (>10.000 mm water column) and a high breathability (>5.000 g/m<sup>2</sup>/24 h). The exceptional flexibility of the fabric ensures an ideal wearing comfort. PRO-X elements 4WAY Stretch is an extra lightweight and thin material with a PXE-Membrane, and therefore not suitable for a backpack.

## PXE-PRO / PXE LIGHT

**PXE-PRO** und **PXE LIGHT** are very lightweight 2-layer laminates with an extra soft and textile handle. **PXE-PRO** und **PXE LIGHT** are completely waterproof (>10.000 mm water column), windproof and breathable. The innovative PXE-Membrane transmits the water vapour to the outside and at the same time it stops moisture from getting inside. All seams are sealed with a special tape. **PXE-PRO** and **PXE LIGHT** functional clothing is the perfect companion for Outdoor and leisure through its combination of high functionality and best comfort.

## PolyCotton Light

Durable jackets made of PolyCotton for all leisure and outdoor activities where sturdy and rainproof clothing is needed. With its waterproof and breathable PXE membrane with a 10.000 mm water column, PRO-X elements Urban Outdoor PolyCotton jackets are suitable for all types of weather.

## XL&D

XL&D (eXtra Light & Dry System) is an ultralight fabric with a completely waterproof (>10.000 mm) and breathable PXE membrane respectively polyurethane coating. The sturdy polyamide fabric is characterized by its low weight and high tear resistance. The print on the material inside ensures a pleasant feel on the skin, therefore an additional lining is not necessary.

XL&D functional clothing is ideal for all sports activities, where perfect weather protection and lowest weight are required. XL&D jackets and trousers are available for OUTDOOR and BIKE activities.

## Softshell

Thanks to the PXE windproof membrane the material is breathable, windproof and water repellent. The smooth but robust stretch material with a soft inside ensures a high wearing comfort and best weather protection.

## PRO5000

PRO5000 is a light polyamide fabric with an absolute waterproof (>5.000 mm water column) and breathable (>5.000 g / m<sup>2</sup> / 24 h) polyurethane coating. The PRO5000 material with its classic look has a pleasant soft handle and is outstandingly suitable for all outdoor activities.

## XPLUS

XPLUS is a light polyamide fabric with a waterproof polyurethane coating. XPLUS is especially used for hiking- and bike-ponchos as well as light weighted rain jackets and rain trousers.

## PRO-XVIPRO

The transparent frosty material allows the team outfit underneath to be seen. At the same time Visible Protection Clothing is completely waterproof (10.000 mm water column), highly breathable, ultralight, elastic and windproof.

## PRO-X elements Active Advantages

Since the beginning of 2016 for all of its products **PRO-X elements** is using a PFC free waterproofing impregnation, counting on the Bionic Finish Eco formula by Rudolf Chemie and Teflon Eco Elite™ by Chemours™. These impregnations can do without per-/respectively polyfluorinated compounds (PFC's) which can be detrimental to the environment.

**PRO-X elements** provides as usual a lot of products that are easy to pack away in their own pockets or in a separate small bag. Almost all jackets, trousers and ponchos are stowable in the practical Packable-pocket or in the small Packable-bag and thereby easy to carry around. These products are recognizable by their Packable sign in our Catalogue.

## PRO-X elements Fitting Expertise

For optimum use of a garment the perfect fit is indispensable. This has decisive impact on the wearing comfort and the function.

Therefore, **PRO-X elements** jackets are available in up to 10 men's sizes and 12 women's sizes, **PRO-X elements** trousers in up to 13 men's sizes and 19 women's sizes. With more than 35 sizes, **Pro-X elements** covers nearly the complete spectrum of human body dimensions.

For diverse body proportions, we provide different cuts. With Slim, Regular and Comfort Fit **PRO-X elements** perfectly meets such requirements.

Not every person has ideal body dimensions that is the reason why we have long sizes and short sizes for our trousers.

In addition, it is possible to shorten most of our trousers by 2 cm because the zippers do not end at the bottom of the legs.

The **PRO-X elements** Fitting expertise:

### Men:

- |             |   |
|-------------|---|
| Slim Fit    | is a body-hugging cut for slim people.                      |
| Regular Fit | stands for a comfortable fit that is suitable for most men. |
| Comfort Fit | is a slightly wider cut for people with a broader chest.    |

### Women:

- |             |   |
|-------------|---|
| Regular Fit | is a comfortable cut that is ideal for most women.                              |
| Slim Fit    | stands for a figure-accentuating fit with a more or less pronounced waist-line. |

### Trousers:

- |    |  |
|----|--|
| UG | sizes are fitting people who are slightly smaller and/ or burly. |
| LG | long sizes are made for people with a longer leg length.         |
| KG | short sizes are for people with a shorter leg length.            |

## PXE Transition Concept

New for 2019, **PXE Transition** provides, besides its rain shield a thermoregulation during the transitional weather period and therefore the wearing comfort is excellent, also at lower temperatures.

The thin padding (60 gr./m<sup>2</sup>) is very light and hardly noticeable. It provides the necessary cushion of air to keep the warmth close to the body. With the PXE-PRO 2-layer laminate the jackets have an extra soft and textile handle. They are absolutely waterproof (>10.000 mm water column), windproof and breathable.

Since the transitional weather period here in Europe can vary, **PXE Transition** from now on belongs to our NOS-Program and is available on stock all year through.

Extra soft **PXE-PRO** material

### Active Advantages:

- Lightweight insulation
- Waterproof 10.000 mm
- Breathable 5.000 g/m<sup>2</sup>/24h

Lightweight 60 gr. padding

## PXE Transition Concept

### 7812 PHASE

PXE-Transition men's jacket

PXE Transition: - For colder days

**Material:**

2-layer-laminate 100 % polyester with PXE-membrane breathable, waterproof, windproof, taped seams

**Lining:**

100 % polyester

**Padding:**

100 % polyester

**Water column:** 10.000 mm
